Semi-Final For The Crahan Cup

FRANK VS. COLEMAN

This football game took place at Frank on Saturday last under ideal conditions, and before a good crowd of enthusiastic spectators. Frank was without Miller, Patterson filling his position, while Watson reappeared as left back for Frank. The teams were:

Frank—Paton goal, Marples and Watson backs, Patterson, Tristram and Jepson half-backs, Hutton, Parker, Jordan, Marsh and Morrison forwards.

Coleman—Pleasants goal, Macaulay and Emerson backs, Hunter, Jackson and Macaulay half-backs, Holmes, Beddington, Muir, Kelly and Banks forwards.

Referee—J. Tennant, of Bellview.

Coleman won the toss and elected to play down hill with a good breeze of wind in their favor. Parker, defying three opponents, slipped the ball out to Morrison on the left, who hesitating to take the ball on the run, missed a fine opportunity of giving Frank the lead in the first minute. After this quite a little in-filled play followed, and, from a cross by Hutton, Marsh got the ball and passing Hunter, scored with a fast low drive. Giving the Coleman custodians not a chance whatever, they seemed to liven up the play somewhat, and Coleman became the aggressive, trying hard to equalize, but finding Frank's defense hard to penetrate. A little end to end play, after which Hutton had a nice corner, which Hutton placed well, enabling Marsh to add No 2 with a fine header. This ended the scoring up to half time—Frank 2, Coleman 0. Upon resuming, Coleman pressed the Frank defense, but found Paton, Marples and Watson a stone wall which could not be broken, and from a drive-away by Marples, Morrison seized on to the ball and sent it across to Hutton, who back-heeled to Parker, enabling the latter to add No. 3. They seemed to liven up more than ever, and finding they had matters very much their own way, Parker came along and quietly added No. 4. This seemed to prick Coleman forwards a little, and from a nice piece of combination Beddington worked the ball out to Holmes, who sent in a fast shot which Paton saved, only to send the ball to the foot of Kelly who sent a return out of the reach of Paton, thus giving Coleman their only solitary goal. At this stage Jepson and Tristram were playing a great game, feeding their forwards with great accuracy. From a nice pass in which Jepson played Marsh in a fine position to do the hat-trick, No. 5 was scored. From a little misunderstanding between the Coleman defense, Jordan slipped in between the backs and added No. 6 with a fast drive. There was no further scoring, as Coleman had to retire with well-earned credit to a score of 6 to 1. The game was exceptionally clean and frank fully deserved their victory. Referee Tennant handled the game well.

Alberta Leads in Child Protection

Edmonton, Alta., Sept. 3rd.—Congratulatory letters and telegrams received by R. B. Chadwick, provincial superintendent of the department of neglected and delinquent children, from social service and reform workers all over the United States and Canada, show that Alberta leads the American continent in child protection. The laws now in force in this province are admitted to be most advanced in America and their administration is said by men and women, who have made child protection a life study, to be a boon to humanity. The Child Saving department at Washington, D. C. says among other things in its letter: "Alberta's work stands preemminently as the best on the continent," while W. L. Scott, father of the Dominion delinquency act also highly complimented the department upon what it has accomplished. Heads of industrial schools, reformatories and penal institutes in the states and provinces urge Mr. Chadwick to attend the next meeting of the Prison Congress and tell the delegates something about the work that is being done in Alberta.

Justus D. Willson, veteran of the North-West Rebellion and the South African war, commandant of the Legion of Frontiersmen in Edmonton, which consists of some of the foremost pioneers of the western country, has offered the services of 1,000 men for transport, provisioning and communication work. Edmonton and central Alberta will also send a large number of trained nurses and experienced ambulance corps men to the fighting line. Another contribution by Alberta is 500,000 bushels of oats.

Several hundred French reservists, joined by Belgian, Swiss, Hollanders and Italians, have left Edmonton in response to the call of arms. Three hundred Austrians started for the front at the first call.

Edmonton has all the appearance of a garrison town these days. Soldiers in service uniforms are seen everywhere and sentries have mounted guard at the armories and supply stations. The railway bridges are guarded day and night. There is the keenest interest in even the smallest details of the military and naval forces and crowds are gathered day and night at the newspaper bulletins.

The steel passenger steamship Admiral Sampson, of the Pacific-Alaska Navigation Co., was rammed and sunk on Wednesday of last week near Seattle by the C.P.R. Princess Victoria. Two lives were lost.

It pays to advertise! One local man had two houses vacated last week. He advertised in our last issue for new tenants and informs us of good results. Both houses are now re-occupied.

Morgan-Evans Nuptials

A very pleasing event took place

at the home of Mr. and Mrs. Wil-

ian Evans, Dearborn Street, on

Tuesday evening, when their daughter,

Miss Blodwen, became the wife of

Owen Morgan. The ceremony

was performed by the Rev. W. H.

Muncaster, B. A., D. D., in the

presence of a number of relatives

and friends of the contracting par-

ties. After the ceremony a sumptuous wedding supper was partaken of, after which the young couple boarded the east bound train for a brief honeymoon trip. The young couple were recipients of a large number of valuable presents.

New Appointment

Mr. R. W. Brock, director of the

geological survey and deputy min-

ister of mines at Ottawa, has re-

signed his position to accept ap-

pointment as the head of the ap-

plied science department of the

new university of British Columbia.

Mr. R. J. McConell, who is now ac-

tacting deputy minister, will probably

succeed Mr. Brock at Ottawa. The

latter has been head of the geolo-

gical survey for the past six or seven

years, and has been a most capable

and valued officer.

United States

Newspapers Must

Be Suppressed

Winnipeg, Man., August 27.—

Col. Lawless, in charge of Winni-

peg military district, today issued

an order to all news dealers, news

stands and newsboys to cease dis-

tributing United States papers.

Copies of these papers with war

headlines have attracted large

crowds and in some instances had

Canadian war news which the

papers here are not allowed to print.

As there are heavy penalties fixed,

there is a great scarcity of United

States papers in Winnipeg today.

CHILDREN
TEETHING
MRS. WINSLOW'S
SOOTHING SYRUP
USED BY MILLIONS OF MOTHERS
FOR THREE GENERATIONS

Modern Compliment
"Of course mothers should be com-
plimented for their daughters," said Mrs.
Eveley.

"And they are," replied Colonel
Courtly. "The girls of today will be
entitled to congratulations if they suc-
ceed in being as good looking as their
mothers." —Washington Star

Why She Was Glad
"So glad you proposed!" That
puts me one up or Delia. She's only
had three this month.—Philadelphia
Record

A safe and sure medicine for a
child troubled with worms is Mother
Grove's Worm Extricator.

When Billings bought his new
house it was with the express under-
standing that he would have a room
all of his own, don't you know?
"Yes, I know what you mean. Did
he get it?"

"How?"

"With a sewing machine, a cutting
table, two dressers, dummies, two
sewing chairs and a full-length mir-
ror."

"Pa, what's a teetle?"

"There isn't any such thing, Har-
old."

"Yes, there is. It says in this
book that the young man had a
teebly growing down on his cheek."

"I'm afraid you may think we're giv-
ing you a lot of fish this week, old
man," said the general host, as they sat
down to dinner. "But you see, Pa, we
has got hold of what sounds like a
really capital device for removing a
tobacco stuck in the throat, and we
want to see if it works." —Tit-Bits.

Minard's Liniment Cures Garget in
Cows

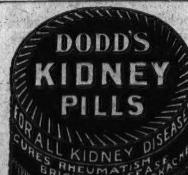

An old goldfish breeding station in
the outskirts of Tokio, Japan has a
pond area of 44,000 square feet and
an annua! output of about \$50,000
in fish, all addition to which golden
carp and common carp are grown.
The persons are employed in the
branches of the work, and six vari-
ties of fish are handled.

"Tell me about your aunt, old Mrs.
Blank. She must be rather feeble
now."

"We buried her last year," said the
other.

"Buried her? Dear me! Is the old
lady dead?"

"Yes; that's why we buried her,"
was the response.—Tit-Bits.

Transmission of Sight by Wire
Once more we are assured, and ad-
vised from England, of the success of
the experiments enabling us to use
the telephone to see the person at
the other end of the wire. Low,

The inventor, Dr. A. L. Low, a
well-known scientific engineer, has given
us a short description of the apparatus
and method of the new wonder.

The transmitter is a screen, con-
sisting of cells, each containing the elec-
trical resistance of which varies accord-
ing to the light that touches them.

Over this screen there passes a sym-
bol of a number of places, which are
alternating conductors and insulators.

The roller is driven by a motor of
250 watts, and the variations of the
resistances, of light, are transmitted
along an ordinary conducting wire.

The symbol of cells is repeated by
the passage of polarized light through
thin glass of steel and at this receiver
the object, which before the transmis-
sion, is reproduced as a flickering
image.

The process is described as a "kin-
ematical application of a common
electrical principle." The sys-
tem has been tested through a resistance
equivalent to a distance of four miles,
but the opinion of Dr. Low there
is not that it will be of much value
equally effective over far greater
distances.

"The tones of the human voice, of
which there are hundreds of gradua-
tions," says Dr. Low, "can be repre-
sented by wireless telephony. The
graduations of light are far more
than those of sound, and should be
possible to devise a wireless means
of transmission. I will commit my-
self to the prophecy that in fifty
years' time people will be able to
travel at the speed of light when it is
necessary to be at a person's side in
order to see him. When this day
arrives, consider what will have hap-
pened to the methods of warfare. Imagine
the altered methods of military op-
erations when you can see what is hap-
pening miles away."

At present the image reproduced is
at the size which the eye of a can-
nibal would take. It shows variations
of light, and is equivalent to a
symbol of a half-ton block, but it does
not reproduce color.

Dr. Low is well known in London
as a consulting engineer and as
a member of a laboratory research for
the government. A number of inven-
tions stand to his credit, including
the low high pressure tank, includ-
ing the compressed air engine. The
experiments in connection with light
by wire have extended over five
years.

In the transmitting screen no human
may be replaced by any "dramatical
material." The cost of the apparatus
is considerable, as the conduc-
tive series of the roller are made
of platinum.

Modern Succession
"The secret," we learn from
Dr. Low, "is to make the roller
conductivity, reminiscent of his
countryman, Aristotle. He was the
champion of his native village of
Corinth. We are told that he was
accused of being a pretender and
that he was arrested and brought
before the local justice for
chicken stealing."

"Judges, like honor," he said, "plead guilty on the advice of my
lawyer, but I am innocent."

"But the local justice gazed at the
noted provocateur and rubbed his
chin dubiously. 'I'm afraid,' he stam-
mered, 'I guess—wal, Ram. I guess
I'll have to—have more evidence be-
fore I sentence you!'"

When the Waiter Wins
Two men were wrangling as to
who should settle with the waiter
for the bill. One had been fully decided
and the contestants had gone the waiter
said to one of his regular customers,
who was a witness of the quarrel,
that he was a "worn-out" waiter
and that he was likely to be a
failure. "It happens we come in for an extra
tip. The man who couldn't get the
check has only one way to get it,
and that is to give the waiter
something and nine times out of
ten he does it and make the amount
more than he would have given if he
had not been so bad." The other
waiter, after extra tips, and left the
place, said to the customer, "We like the 'give me
the cheque' quarrel."

Not Much Account, After All
Sir Robert Ball, the famous Eng-
lish astronomer, whose death
occurred a few months ago used to
tell his way of explaining
that he had when he was at the
Dunskis Observatory.

"Surely you can," said Ball. "Come
round tonight and I shall be very
happy to tell you all about it." The
customer agreed.

"Can't I see it now?" asked the
would-be astronomer, surprised.

"I'm sorry that you can't," said
Ball. "You will have to wait until
night."

"Huh!" Then your old telescope
must be a good one," said the
customer.

"It is," cried the man, relieved from
his illusion. "I can see the moon at
night without it."

Poetry Excels Poems
The romantic spirit is that which
unfolds the loveliest efflorescence of
the human mind. The great poets are
as Aesculapius' herbs to the breath of
poetry, which is sublimated romance.
Lesser men are writers of poems of
verses. A man may not be a poet, but
he can paint pictures, a poet because
he writes poems; the maker, the
inventor, the seer, he and he only is
the poet, the artist—William Sharp.

A Case of Necessity

Speaking of children at a social
function, a well known author told
the story of a maid attending the little
daughter of the house playing with a
gingerbread cat.

"A very nice cat you have
there," said the maid. "Are you going
to eat it?"

"No," answered the youngster,
affectionately stroking the cat with
her little hand. "It is too pretty to
eat."

Three or four days later the author
had called at the house again and his
hostess reverted to the gingerbread
cat.

"I don't see your cat, Gladys," he
said, "but the child came into the
room with her pretty-handled cat with
a regretful sigh. 'What has become
of it?' she asked."

"It's gone," announced Gladys,
with a regretful sigh. "What has become
of it? I just had to eat it."

Where Alice Failed

Husband (I, second wife)—You
haven't cook like Alice, my first wife,
you don't do, Ma. I am a divisional
superintendent and his staff. Sc-p
and obsolete material was collected
to the amount of 150 car loads.

"You are not so smart at getting about
as Alice was. You don't appear to
catch on where she left off."

"About the same," he said, "but I am
not so good at getting about as Alice
was. You mean by that?"

"I am doing the work that Alice
performed," he replied, with evident
satisfaction.

There was more peace in that house
bold afterward.

Clean Stomach, Clear Mind—The
stomach is the workshop of the body
and the digestive organs are the
spiritus fagi, the mind droops and
the mind becomes impossible.

The Britons used to restore
the health of the body by taking
the best preparation for that purpose.

Farmer's Vegetable Pills. General
use for years has won them a
universal reputation.

Prevention Wall

The Roman wall had a curious, but
little known, pedagogic use.

Before doing the thing themselves,
the Romans counselled the Britons
to build a wall with the result that
they did.

The Britons, however, insisted that
the wall not, of stone as they were
advised, but made it of turf, and it served
a useful purpose, for it served
as a wall of hard stone, "the Britons
putting up all that was before them,"

and though they told the Britons plainly
that wall, to take upon them any
lesser and more easily digestible
food, they did not do so.

The Britons, however, insisted that
the wall not, of stone as they were
advised, but made it of turf, and it served
as a wall of hard stone, "the Britons
putting up all that was before them,"

and though they told the Britons plainly
that wall, to take upon them any
lesser and more easily digestible
food, they did not do so.

Bellevue Happenings

(From our own Correspondent)

The new restaurant is progressing favorably and is nearing completion.

Dr. Fraser was in camp on Monday, recruiting men for the police force.

Mrs. Hugh Hutton has been under the weather this week with a cold.

Inspector Junget, of the R.N.W.M.P., was in the camp on business Monday.

The Boutry Brothers have started the foundation for the flour and feed store.

A crowd of Bellevue sports took in the game between Frank and Coleman on Saturday.

Mrs. Mitchell, of the post office staff, spent her holidays in Calgary. She returned this week.

BORN—To Mr. and Mrs. Noble McDonald, a daughter. Mother and child doing well.

Don't forget the big dance in the Workers' Hall on this Friday night. Come and have a good time.

The shooting gallery in the McCutcheon block is furnishing quite a lot of sport for the young bloods.

Rev. Mr. Cook and Walter Scott were fishing at Daisy Creek on Wednesday and brought home a good catch.

Rev. C. H. Huestis, secretary of the Lord's Day Alliance for Alberta and British Columbia, was in camp this week on business.

The police had quite a lively time on Sunday evening when one of the police court old-timers was brought in for a night's free board.

Mrs. Allan Hamilton, who has been spending the summer with her parents in Nova Scotia, returned to camp again on Monday.

MASTER MECHANIC OVERALLS
UNION MADE
THE BEST OF THE HIGH GRADES

BEST goods and highest skilled labor combined, make the Master Mechanic the leading overall. More comfortable and wears longer than any other overall on the market. Special snug fitting cinder proof band collar.

WESTERN KING MANUFACTURING CO. LTD.
WINNIPEG

The son of Mr. and Mrs. Patrik McGuire was operated on in the hospital for appendicitis on Thursday. He is progressing well at the hospital.

The population of this berg is still increasing. This week the stock left a son with Mr. and Mrs. George Coupland. Mother and child doing well, and father still smiling!

The meeting held in the Eagle's Hall on Sunday evening was largely attended by Oddfellows and others interested in the formation of a new lodge in Bellevue. There will be another meeting on the evening of Sunday, September 18th, when a full attendance is expected.

Don't forget the Sunday school picnic at Crows' Nest on Monday next, September 7th. The arrangements are complete. Tickets may be had as usual from the agent at the station, adults 60 cents return, children 20 cents. Sandy school children will receive tickets free. Parents of the children are especially invited and are requested to bring their own sandwiches. Children of the Sunday school will be provided for by the school, so come along and have a good time.

The battle to decide whether history will repeat itself in a second siege of Paris is still in progress, according to the latest official announcement. All the British public know officially concerning the titanic struggle—did the most momentous British soldiers have fought since Waterloo—is contained in one sentence of an official report issued last night by the press bureau: "Continuous fighting has been in progress along the whole line of battle." To this the official communication adds the fact that all forces have fallen back to the south, to avoid action which might be engaged in under unfavorable circumstances.

Three million Frenchmen are under arms to defend Paris. They still have confidence in the ultimate result of the war.

The list of killed, wounded and missing British officers from the crack regiments which were engaged in the four battles of last week, brings mourning to many noble and aristocratic homes in Great Britain. This, however, is the price of war, which the country appears willing to pay.

The Prince of Wales fund for the relief of suffering is now over half a million. Recruiting in Great Britain has received an impetus from the events of the last fortnight.

Military experts say that Paris will soon be the pivot of the hostile forces operating in the area of the west. Even the downfall of the French capital, it is believed, would not end these operations.

The feeling of confidence was increased greatly by the news of the great victory of the Russians in Galicia. Reports from Petrograd tell of the entry of the Russians into Lemberg, the capital of Galicia. The battle of Lemberg was one of the greatest ever fought. Evidently it resulted in a decisive and perhaps overwhelming defeat of the Austrians.

The battle line extended over 200 miles, and it is estimated that 1,500,000 men were engaged. The Austrian army in Galicia was acting in close co-operation with two German army corps facing Breslau, seeming to envelop the Russians.

In the west, the line now held by the left flank of the allied armies in the valley of the Oise, runs diagonally from a point northeast of Paris to Compiegne, and thence through Noyon to LaFere, one of the weaker of the fortified towns which is in the hands of the Germans.

Farther east and north the allied armies apparently hold their own in the neighborhood of Laon and Bethel (24 miles northeast of Reims). The ring of the allies rests on the fortified Franco-German frontier. The name of the British who fell in the four-day's battle last week will not be announced until they have been communicated to the relatives.

The Germans are pushing their right wing near Paris, while the strong left appears to be held by the French.

Russia is pressing forward in the Austrian provinces of Galicia after having taken the strongly fortified capital, Lemberg. The Germans are admittedly victorious in east Prussia.

The Governor and other German officials of Samos, have been made prisoners by the British and sent to the Fiji Islands.

An additional commission of four cents for every pound or fraction thereof over \$100 is being levied on money orders to Great Britain. The issuance of money orders was resumed on Wednesday.

Ford
THE UNIVERSAL CAR

**Buyers to Share in Profits
Lower Prices on Ford Cars**

Effective from August 1, 1914, to August 1, 1915, and guaranteed against any reduction in that time.

TOURING CAR	\$590
RUNABOUT	\$540
TOWN CAR	\$840

F. O. FORD, ONTARIO

FURTHER we will be able to obtain the maximum efficiency in our factory production, and the minimum cost in our purchasing and sales department. If we can reach the same standard of quality as the above cars, we believe AND should reach this production we agree to pay, as the buyer's share, from \$40 to \$60 per car (on or about August 1, 1915) to every retail buyer who purchases a new Ford car between August 1, 1914, and August 1, 1915.

For further particulars regarding these low prices and profit-sharing plan, see

How to Open a Stiff Penknife.

Sometimes it is very difficult to open the blades of a new penknife, or those of one that has been used for some time. The blades work very easily at first, but after a while they get so stiff that it is difficult to open them. If we try too hard to raise the blade with 't' there is a risk of breaking it. A method of opening a stiff blade is to make a sharp cut in the paper, and then to fold the paper back over the blade. This seems very astonishing if we have never tried it or seen it done. We slip a piece of folded paper under the blade, and then raise it by the edge of the paper, we can easily raise the blade without the blade cutting the paper. We should suppose it would not be thick. Oily or thin kind of paper can be worked under the blade, and a narrow strip is quite sufficient for the purpose.

A man was testifying about the explosion of a gun in a gun-vessel—when he sent him to the hospital for some months.

"Please give our version of the explosion," he was asked.

"I'm afraid I was standing beside the gun, there was an awful racket, and the doctor said: 'Sit up and take this'."—Ladies' Home Journal.

FARMER'S WIFE ALMOST A WRECK

Restored to Health by Lydia E. Pinkham's Vegetable Compound—Her Own Story.

London, Ont.—"I am a farmer's wife and a very busy woman. Last summer I was taken with a severe attack of rheumatism, which had sent me to the hospital for some months."

"Please give our version of the explosion," he was asked.

"I'm afraid I was standing beside the gun, there was an awful racket, and the doctor said: 'Sit up and take this'."—Ladies' Home Journal.

One day a friend of mine told me to try Lydia E. Pinkham's Vegetable Compound as she had been greatly helped by it. I began taking it and soon got well, and my personal health was restored. Since then I have had perfect health. In fact I have never felt so well in my life. Lydia E. Pinkham's Vegetable Compound is a medicine many women need. If you think this letter will help others, please send it to—Miss G. Young, Publishing's Corner, London, Ontario, Canada.

Women who suffer from those distressing fits peculiar to their sex should not doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Eddy E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Mechanic Turns Farmer

When the v-y man, green at farming, turns to agriculture for a living, he frequently finds himself in a groove of tremendous assistance. Thus a salesman is pretty sure to market his products to advantage; a professor is equally sure of his judgment to his new work; a tradesman possesses trained ability which works in hand in his new enterprise. And the man who is anxious of something else, the likelihood of him succeeding at farming is increased.

It was with Mr. R. A. Alexander of Aldergrove, B.C., who was formerly a machine designer by profession. Alexander, in his new sphere of activity, has not only with his expert knowledge to account on most farms the workshop contains simply a bench, a vice, and various tools. Alexander's workshop is a comparatively complete machine shop, equipped with arbor, forge, drilling, machining, banding and steel iron and wood working tools.

This machine shop has proved of invaluable assistance in conducting the farm. One of Alexander's main projects is the raising of cattle for breeding. He has a fine herd of Jersey cattle, which was bad with kidney disease and suffered greatly from headaches, pain in the abdomen and stomach and his heart was affected by a year ago. He treated by her doctor, with no apparent benefit. She then used five boxes of Dr. Chase's Kidney-Liver Pills. With more satisfactory results. This gave us such a good opinion of Dr. Chase's Kidney-Liver Pills that we always keep them in the house for use for the treatment of the kidneys and bowels." Dr. Chase's Kidney-Liver Pills, 25c a box for \$1.00, all, are made in Montreal, Quebec, Canada.

Young Wife—Don't you admire it when your wife says the right thing at the right time?

The Spinster—I'm sure I could if I ever have the pleasure of meeting such a ma—London Illustrated Bits.

Discouraging

Mother—Why, Ethel, you mustn't be so discouraging! But in encouraging, handing grade Jerseys exclusively. His field crops have been uniformly successful and his potates have given him a good yield.

The Father—The author is particularly proud of his Aldergrove farm, which is situated in a valley, and the soil is very good.

Young Wife—Well, Tom, you will be right next month, and then he'll be a year older than me again, and I've tried so hard to catch him up—London.

Ready for it

Young Wife—Don't you admire it when your wife says the right thing at the right time?

The Spinster—I'm sure I could if I ever have the pleasure of meeting such a ma—London Illustrated Bits.

Encouraging

Mother—Why, Ethel, you mustn't be so discouraging!

Young Wife—Tom, you will be right next month, and then he'll be a year older than me again, and I've tried so hard to catch him up—London.

Too Much For the White

The Sunday school teacher was making a review of the Bible lesson.

"Who was the wisest man, James?"

"Solomon."

"That's right. Now, Frank, who was the wisest man?"

"Joni."

"Wrong. What reason have you for believing Jonah to be the strongest man?"

"Cause the whale couldn't hold him off it got him down."—Philadelphia North American.

Nora was applying for a place as cook, and when asked for a reference she said: "What's the use?"

"To what it can't do."

"This is to certify that Nora Foley was employed for us for a week and we are satisfied."

WIRE WOUNDS

My mate, a very ugly one, was pruned and cut by her when caught in a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use gunpowder. I followed his advice at first, then stronger as the sores began to look better, until after three weeks, the sores had healed, leaving a scar which is not white, and is NOT WHITE as is most always the case in horse wounds.

Roger Bacon

Predicted Steamships and Aeroplanes

The seven centuries since the birth of Roger Bacon was celebrated recently at Oxford University, where the famous philosopher studied some years ago.

Bacon appears to have predicted many things which have been realized, such as the steamship, the automobile, the flying, etc.

One of the greatest Baconian minor

works, the treatise on the marvelous power of art, which was written in 1267. His early reputation as a man of power and mechanical inventions partly arose out of a passage in that treatise, stating that it was possible to invent an instrument of navigation without man to row in them." "chariot's moving with insuperable force, without any living creature in them; by which the world may be traversed by water and land." It is believed that this prediction was realized in 1807 when the first steamship, the 'Wright', was built.

THE WELLAND CANAL A NATIONAL TASK

A GIANTIC PROJECT UNDER WAY THAT IS NATIONAL IN SIGNIFICANCE

Canada Is Spending Fifty Million Dollars to Improve Transportation Facilities—To Carry Trade From East to West.

Today Canada is making geography, not of the ephemeral sort, that passes away in a generation, but of permanent and abiding character that will stand for a century and beyond. Right in the heart of this North American continent—almost at the centre of Toronto—Canada is carrying upon its shoulders, in its conception, purpose, magnitude, in its effect, national significance. That is what Canada is about in the building of the new Welland Canal.

The appellation Welland Canal, is perhaps three-quarters of a century old. The old Welland Canal was a narrow, shallow, earthen embankment, the "levee" as part of the daily curriculum. But, with all this, how many know that right at the threshold of Toronto, a group of engineers, working day and night, were employing its wealth, its brains, its muscle, to overcome the natural obstacle to navigation presented in the Niagara cut-off—open to the improvement of the facilities of the existing gap; to "ensure that the trade of Canada will flow east and west, and that Canada herself will be the link of the car rierations of the world."

These are some of the problems involved in the project, but they are not the whole story. And it is to their solution that the gigantic project is now under way.

It is no idle boast to speak of the construction of the new Welland Canal across the Niagara Peninsula as one of the world's greatest engineering tasks. Indeed the estimated expenditure of \$50,000,000 is but a small part of the amount to be spent by that claim. But, in these days of great engineering construction the new Welland Canal will rival its predecessor in the carrying of the needed waters to Panama, where two oceans are joined, and in its commercial efficiency to the prototype of all canal construction.

There is a romance in the history of what may be called the Welland Canals, and there is the charm of tradition in the old Welland Canal, in design and new in the construction, of the greater Welland. For its realization men have striven in the glare of the most brilliant lights of fame, in the halls of parliament and in the secluded chambers of the council chamber.

It is man's work; it is a work for many men; it is a worthy task for a nation. The men who build these canals don't figure in literary fame. They compete with the gods of war, and strive to remove mountains. They pick up a railway here, and deposit it bodily over there. They compete with the gods of war, and strive to remove the smallest thing to do was to lift a great steamship with ten thousand tons of cargo over a sunken hill, and place it on an even keel 25 miles away.

It is worthy to note that the directing genius of the new Welland Canal is Mr. John Laird Weller, engineer in charge of survey, design and construction. He is one of the increasing number of graduate engineers in the profession. In one branch of the imperial service or another we have brought great and lasting credit to their alma mater and to their country.

Mr. Weller is born at Cobourg on February 13, 1862. At the age of twenty-one he was an assistant engineer in the British Columbia Survey in 1885 to 1900 he was connected with the St. Lawrence Canal system, and from 1900 to 1912 superintendent of the Welland Canal system.

In 1908 he was called to the Cornish Canal in 1908, Mr. Weller was called

from St. Catharines to take charge of that work.

The first shovel started to work on October 3, 1913, and the specifications provide for the completion of all contracts within two years for the opening of the canal in 1915.

Fifty million dollars is, roughly speaking, Mr. Weller's estimate of the cost of completing the canal. The contractors place the cost considerably below his estimate, and one ambition the engineer has is that the whole undertaking should be completed and handed over to the government in the original estimate.

All the work is being done by contractors, and the building of the lock gates, which are provided by the department to insure uniformity of quality and a lower price in view of the number of locks. One lock gate will be put in at Fort Weller and Port Colborne. Care has been taken to provide ample safety factors to make the canals safe for passage and commerce.

Mr. Weller's experience with canals has enabled him to introduce what he deems many improvements that will facilitate canal operation.

The locks are all of the same size, and the parts are interchangeable. In the multitude of detail to-day he has the opinion of the completed canal, meeting the products of the prairie, imports the from the old land; eastern Canada, grasping through the north stretched the hand of the west in one great national purpose—*Toronto Globe*.

DAIRY CONGRESS

Canada Sent J. A. Ruddick to Meeting in Switzerland

Mr. J. A. Ruddick, Dominion dairy commissioner, has returned from attending the sessions of the international dairy congress held in Zurich, Switzerland. The congress is held there triennially and gathers together the most eminent dairy experts of all parts of the world.

The delegates were given a very hearty welcome at the capital of Alpine republic and the addresses were repeated in the various sessions. The addresses were read chiefly in French and some were given in German and others in English.

HAS NO COUNTRY

Russian Tailor May Not Be Allowed to Land on Either Continents Whether Ike Willis, a Russian tailor, aged 30, will permission to become a passenger on a ship that travels to America from England or Russia when he comes out of an English prison in a man's time is a matter of speculation.

Willis is an undesirable alien, who was charged at London sessions with contravening an exportation order which had required him to leave England for a certain date and beyond. Right in the heart of this North American continent—almost at the centre of Toronto—Canada is carrying upon its shoulders, in its conception, purpose, magnitude, in its effect, national significance. That is what Canada is about in the building of the new Welland Canal.

The appellation Welland Canal, is perhaps three-quarters of a century old. The old Welland Canal was a narrow, shallow, earthen embankment, the "levee" as part of the daily curriculum. But, with all this, how many know that right at the threshold of Toronto, a group of engineers, working day and night, were employing its wealth, its brains, its muscle, to overcome the natural obstacle to navigation presented in the Niagara cut-off—open to the improvement of the facilities of the existing gap; to "ensure that the trade of Canada will flow east and west, and that Canada herself will be the link of the carrierations of the world."

These are some of the problems involved in the project, but they are not the whole story. And it is to their solution that the gigantic project is now under way.

It is no idle boast to speak of the construction of the new Welland Canal across the Niagara Peninsula as one of the world's greatest engineering tasks. Indeed the estimated expenditure of \$50,000,000 is but a small part of the amount to be spent by that claim.

The engineer, Willis was said, to have been twice rejected by the United States authorities and that the Russians "failed to have any objection to his landing." He has now been twice rejected by the United States authorities and that the Russians "failed to have any objection to his landing."

"Business jealousies, social jealousies, and misandromes" are reasons of frequent causes of friction between town and country.

In the city there are societies of all kinds, clubs, associations, city clubs, social service leagues, health societies, the list grows longer every day, but it need not be the concern of ours. Does it need nothing? Life is in the country town or village so near perfection that no improvement can take place?

Yet we must bear in mind that men have grown accustomed to things as they are, or have been discouraged at repeated failures. On a few days ago, I was invited to come to the city so that he might find a field for community work. His eyes had apparently not opened to the needs of the people, the wonderful opportunities for social service that were all about him in his own little town.

For his benefit, and for the benefit of the people, I told him let me quote a few paragraphs from an article by F. M. Hanson of Des Moines:

"Business jealousies, social jealousies, and misandromes" are reasons of frequent causes of friction between town and country.

"Business jealousies, social jealousies, and misandromes" are reasons of frequent causes of friction between town and country.

"Business jealousies, social jealousies, and misandromes" are reasons of frequent causes of friction between town and country.

MILITIA PRAISED BY BROOKE

Says Canadian Soldiers Canasily Admit

Admission to Conditions

"The minister of militia should be well satisfied with the manoeuvres this year, for they have been productive of many interesting lessons," declared Sir H. R. H. Brooke, commanding the Petawawa camp, and afterwards inspected the Maritimes camp.

"Canadian soldiers," added Brooke, "leads a more strenuous life and therefore can adapt himself more quickly to the conditions of military service than any other soldier in the world." He commended the Petawawa camp and afterwards inspected the Maritimes camp.

"The mobilization of thirteen thousand men at Petawawa in so short a time cannot have been possible without great exertion," said Brooke.

"The mobilization of thirteen thousand men at Petawawa in so short a time cannot have been possible without great exertion," said Brooke.

WIRELESS SIGNALS SENT FROM TRAINS

DETAILED EXPERIMENTS ON THE LACKAWANNA RAILROAD HAVE PROVEN SUCCESSFUL

Wireless Service For Operating Trains Now Longer an Experiment

Communicating With Moving Train Will Prevent Wrecks

Since the first wireless telegraph message was sent from a station to another on the Lackawanna Limited to Scranton, Pa., the improvement of the wireless service between trains and stations for communicating with moving trains has been steadily going on. L. R. Foley, the Lackawanna superintendent of communications, is making satisfactory experiments in fields of wireless telegraphy.

The latest accomplishment is the setting of signals by wireless from a moving train or from a fixed wireless station. Foley says that there is no longer any doubt that the wireless signal can be depended on for this signal.

The presence of H.R.H. the Duke of Connaught and Sir Robert Borden at Petawawa did much to stimulate the interest of the troops in their work.

"Signals can be sent by wireless," says Foley, "as easily and as surely as they can be sent by wire. We have a device by which an operator can get a signal at any point if he has occasion to do so."

"Another valuable use to which the wireless controlled signals can be put is the bringing of freight trains to a stop at a score of stations in a serviceable manner. This is the first time that such a thing has been done."

"Keeping trains in motion for long distances without stops will result in great economies," says Foley. "Railroad operators will make many stops between the starting point and destination, with the result that the train will be delayed in getting to its destination."

"Conservation of fuel is another important factor in the saving of time and expense," says Foley. "With a signal set up at each station, the train will be able to pass through them without stopping."

"Conservation of fuel is another important factor in the saving of time and expense," says Foley. "With a signal set up at each station, the train will be able to pass through them without stopping."

Local and General

Milton Robinson was up from Cowley, Tuesday on business.

Six candidates ran in the aldermanic election at Coleman on Friday.

The Misses MacDonald, of Coleman, were in town on Wednesday evening.

The Kritis Grocery Co. opened up for business on Thursday of this week.

Mrs. F. McNeil returned on Wednesday night from a visit to Central Alberta and Lundbreck.

Messrs. G. C. Read, H. Meister and R. Hutchinson returned to Portland, Oregon, last week end.

Some dismantling is being done at Hillcrest, and the mines have been closed down indefinitely.

Have you seen the display of fruit in F. M. Thompson's window? Peaches and Plums at \$1.00 per box, less 5% for cash.

Miss Marie Atkinson, eldest sister of Mrs. (Rev.) A. A. Lytle, of Pincher Creek, died on Tuesday of last week.

The Norwegian steamer Gottfried, and a Danish trawler have been blown up by floating mines in the North Sea.

W. M. Boyd, who has been looking after the winding up of the Brisco business, left on Thursday night for Winnipeg.

Messrs. M. Rossie, M. Muir, J. Faquin and E. M. Brown went out duck shooting on Wednesday and returned with several feathers.

Alfred Parsons, late with the Rocky Mountain Cement Co., here has secured a good position at Bassano, and will move his family there.

A tennis tournament was held here on Saturday between Frank, Hillcrest, Bellevue, and Coleman and local players. The ladies served tea.

The conclave of cardinals to elect a successor to Pope Pius X. was inaugurated at Rome on Monday, attended by fifty-seven cardinals and their conclaves.

Rev. W. H. Moncaster went to Lethbridge Wednesday, where he will officiate on Sunday next. The local pulpit will be occupied by Rev. James Lang, of Passburg.

The Brisco property has been purchased by A. S. Tod, and we understand that the building will be converted into an entirely modern drug and stationery store.

A ten-centers and sale of work will be held at the home of Mrs. L. P. Robert on Wednesday evening, September 9th, in aid of the funds of the Presbyterian Church. Tea from 3 to 5 p.m.

W. Barrington Reilly, vice-president and managing director of the Rocky Mountain Cement Co., Ltd., is seriously ill at Vancouver, and fears for his recovery are entertained.

The Department of Mines has opened a branch office in the Budd block, with Mr. Shaw, of Edmonton in charge. Messrs. Sterling and Aspinwall are in town on Wednesday looking after the establishment.

Services on Sunday at the Central Baptist church will be conducted at 11 a.m. by the Rev. W. T. Young, of Frank, and at 7.30 p.m. by W. S. Black, B.A., principal of the Coleman school. All are cordially invited to attend these services.

Last week 106 bodies were recovered from the Empress of Ireland. Most of them were buried immediately in the cemetery purchased by the Canadian Pacific Railway Co. Only a few have been identified.

Rev. C. H. Huestis, representing the Lord's Day Alliance, addressed a meeting at the Central Baptist church on Friday night last. H. E. Lyon was elected president, and W. H. Verga, secretary of the local branch.

Local and General

M. Rossie took a party of duck hunters to Pincher Creek district on Wednesday.

Mrs. Kidd's maternity home, Box 95, phone 151. Wedding cakes decorated.

Mr. Harris, secretary of the Rocky Mountain Cement Co., was in town from Calgary last week end.

"Cuckoos" were prevalent around Beard's camp on Sunday night last, and daddy displayed great intelligence.

Mrs. R. H. Paton and children left last week on an extended visit to Spokane and other Washington cities.

D. Fraser and R. Foulds left on a shooting and fishing expedition to the North Fork country on Tuesday.

C. Dicastro, Italian consul, was in Fernie last week in connection with examination of Italian residents.

The final for the Graham cup will be played at Hillcrest tomorrow, Saturday, between Frank and Corbin teams.

A ball will be given by the members of Coleman Lodge I.O.O.F. in the Eagles' Hall at Coleman on Friday night of next week.

The marriage of Miss Annie McLeod to John McAuley, both of Coleman, was solemnized by Rev. J. F. Hunter on Saturday last.

It is rumored that chickens are being slaughtered in contravention of the game laws. The chicken season does not open until October 1st.

William Emery and his uncle, Alexander Emery, Water Street, left for Hillcrest, Alberta, on Wednesday the 26th ultimo—Westville Free Lance.

J. A. Osborne and party returned on Tuesday night with a bag of some twenty-five ducks. They secured their catch about ten miles from Pincher Creek.

Mr. Shaw, the new mine inspector for this district, will move his family to Blairmore and will occupy the house recently vacated by Dr. Mackay on Dearborn Street.

Action has been taken to unseat Mayor McNamara and Alderman East, of Edmonton, on the grounds that they are members of an unincorporated association and other charges.

Inspector Junget, of the R.N.W.M.P., was up from Pincher Creek the beginning of the week enlisting recruits for the force. He was accompanied by staff surgeon, Dr. Fraser, of Macleod.

Rev. J. F. Hunter will spend Sunday and Monday next holidaying with friends at Pincher Creek, and will be in the pulpit of the Baptist church there on Sunday evening.

Victoria and Island Development Association, Victoria, B.C.

A blacksmith named Nally, who had been employed by the Rocky Mountain Cement Co. and the Co. company, was stricken with a severe attack of paralysis this week, and succumbed after but two days' suffering. Interment took place at the Blairmore cemetery yesterday.

LOST—On Monday last, between Hillcrest and Frank, a Duber Special Gold Watch with coat chain attached. Inside case of watch engraved "E. Maxwell Brown." Finder will be rewarded on leaving same at the office of this paper or to the Rocky Mountain Cement Co., Ltd.

Services on Sunday at the Central Baptist church will be conducted at 11 a.m. by the Rev. W. T. Young, of Frank, and at 7.30 p.m. by W. S. Black, B.A., principal of the Coleman school. All are cordially invited to attend these services.

Last week 106 bodies were recovered from the Empress of Ireland.

Most of them were buried immediately in the cemetery purchased by the Canadian Pacific Railway Co. Only a few have been identified.

Rev. C. H. Huestis, representing

Bellevue Happenings

Mrs. J. A. Calian returned from the South Fork on Monday.

Bobbie Powers, of the South Fork, spent Monday and Tuesday in town.

England expects that every man this day will do his duty.

Don't wait to be asked—volunteer!

R. Menzel, of the Blairmore liquor store, made a business visit to Bellevue and Hillcrest on Monday.

Angus Campbell, who has been touring the west for some time, has returned to the "only town on the map."

We are pleased to report that J. H. Robertson, manager of the liquor store, has recovered from his recent illness and is now back on the job.

Miss M. Turner, of Blairmore, passed through Bellevue Monday enroute to Cole's ranch at the South Fork, where she will spend a short holiday.

A large number of Bellevilleites enjoyed the dance at Hillcrest on Monday evening. Everyone is strong for Hillcrest and reported a

Frank Happenings

A. L. Blais was away on a fishing trip the early part of the week.

Mr. and Mrs. T. Bradley were Bellevue visitors on Sunday last.

Mr. and Mrs. George Goodwin were in Bellevue on Sunday visiting friends.

Mr. and Mrs. Longworth were renewing old acquaintances at Bellevue on Sunday last.

E. Donkin, with several others, left on Thursday evening on a hunting trip up the North Fork.

Mrs. J. Delaney, who has been in Calgary for the past two weeks, has returned home.

A meeting of ratepayers is called to take place on Tuesday next to consider the reduction of taxes.

Mesdames Hilton and Jepson were Hillcrest visitors on Monday last.

Mrs. Yates of Fernie, who had been visiting here, returned to her home last week end.

A. Bianchi, who has been off work several months with sciatica, has started work again.

F. Aspinal and J. T. Sterling, mine inspectors, were in town this week.

J. T. Tompkins, manager of the Sanatorium Hotel, returned to town the latter part of last week from an extended trip east.

O. E. S. Whiteside, of Coleman, motored down on Saturday last to witness the game between Coleman and Frank.

Rev. F. T. Cook, accompanied by Mrs. Cook, came over from Bellevue on Saturday last to see the football game.

Miss Hilda Hagland, of the Calabash, late of the Union hotel, has accepted a position as head cook at the Union Hotel.

Five of the local boys have left for the front, including T. R. Foster, Harry Leon and Joe McCullough, who have been working for the C. P. R. here.

Don't forget the stationary engineers' picnic to Crow's Nest on Monday, leaving on the morning train. Everybody cordially invited to come.

Frank and Corbin football teams will meet on Saturday, September 5th, on the Hillcrest ground, for the Cranahan cup final. Frank lost in the final for the Nutz cup, but hope to bring the Cranahan cup home.

D. Howe, late butcher here with the 41 Market Co., now occupies the house on the corner opposite the Co-operative store, where he will conduct a butcher shop. There should be a good opening for him.

Harold O'Dell returned last week from a trip to B.C. He spent some time at Creston and Erickson and returning an enthusiastic booster for British Columbia and its fruit lands. Mr. O'Dell is a practical horticulturist and will return to Erickson next spring.

We notice that three prominent Bellevue residents—Bill, Roy and Jack—have offered their services to their country in this, the time of need. They have volunteered as canteen attendants.

Still another new building is to be built in the camp. Mr. Boutre of Burnet, commenced excavation work on Tuesday for the cellar of his boarding house on the lot next to Burnett's store.

The store next to the Southern hotel has again opened its doors. Mr. Gordon, for three years proprietor of the Hub Clothing Store at Diamond City, arrived last week and is ready to open on pay-day with a big sale.

Nature, impartial in her ends, when she made man the strongest, in justice then to make amends—Made woman's tongue the longest."

"MOTHER OF EIGHTEEN CHILDREN"—"I am the mother of eighteen children and have the pride of doing more work than any young woman in my town," writes Mrs. C. J. Martin, Boone Mill, Va. "I suffered for five years with stomach trouble and could not eat as much as a biscuit without suffering. I have taken three bottles of Chamberlain's Tablets and am now a well woman and weigh 160 pounds. I can eat anything I want to, and as much as I want and feel better than I have at any time in ten years. I refer to any one in Boone Mill or vicinity and they will vouch for what I say." Chamberlain's Tablets are for sale by all dealers.

Rumor has it that Tom Sander son has enlisted with the R. N.W.M.F.

Tom Davis has moved over the track to the house vacated by R. Dickens, Mr. Dickens taking a larger house.

The association of stationary engineers will hold their next regular meeting on Thursday evening, the 10th, at 8 p.m. sharp, in the Frank Hotel.

Miss Ethel Gleaves, who left here with her brother about a year ago for her home in England, returned on Thursday to stay with her sister Mrs. Jolly.

A dance will be held on Saturday evening in the Frank hotel dining room. The Cranahan cup will be on exhibition whether Corbin or Frank are the winners. Everybody is invited to attend. There will be a smoker after the dance. Frank orchestra will be in attendance. Admission: Gents \$1.00, ladies free.

Blairmore girls came down to play the Frank girls a game of basket ball on Wednesday evening, bringing with them a good crowd of supporters. The game was very interesting from start to finish, Lelia Purvis being the star player of the Blairmore team, being able to out-reach the high-ball. Blairmore won by a score of 32 to 10.

It was plain to see that a week's rest had done Frank a lot of good, giving them back their old form. The forward line played an exceptionally good game. Watson at left back played his best game for the season. The half-backs played with good judgment. Marples was in his usual good form, and Paton was like a stone wall. In last Saturday's form they should defeat Corbin tomorrow.

Some of the boys of Frank went to Blairmore on Saturday afternoon last and had a friendly game of baseball with the Blairmore champions.

Mr. Verge, the Blairmore school principal, has a team he may well be proud of, and they played well from the start. Unfortunately for the local team they had to get along without several of their best players, including the catcher. During the first part they were outplayed by the Blairmore team, but showed better form toward the finish, so that no runs were scored by either side during the last innnings. The return game is to be played at Frank on Saturday afternoon, September 5th, at 2 o'clock. Frank supporters should turn out at that time and encourage the boys.

DESPONDENCY

Is often caused by indigestion and constipation, and quickly disappears when Chamberlain's Tablets are taken. For sale by all dealers.

New Occupant of Chair of St. Peter

Rome, Sept. 3.—Cardinal Della Chiesa has been elected pope, successor to Pope Pius X. The Pope will assume the name Benedict XV.

Cardinal Della Chiesa was elevated to the cardinalate, May 23, at the last consistory held at the Vatican. He is archbishop of Bologna, Italy.

It has been 156 years since an occupant of the chair of St. Peter has borne the name Benedict.

Pope Benedict XV is the 360th pontiff. His coronation, according to the recent announcement by the Vatican, will not take place until peace has been declared in Europe.

 PUBLIC NOTICE

A Sitting of the District Court will be held at BLAIRMORE on WEDNESDAY SEPTEMBER 9th, commencing at 10 a.m.

Dated at Edmonton, 29th August 1914.

J. D. HUAT,
Deputy Attorney General.
